Savvy Tips

- Table runners add a warm dimension to the table, so get creative and have fun layering!
- For linens longer than your selected table size, simply "tuck" the additional fabric underneath for a finished look.
- Add a table pad prior to laying out your linen for a polished presentation.
- When planning an outdoor event, consider a linen that sits slightly above the ground to avoid getting the linen wet or dirty prior to guests arriving.
- Linen for stand-up tables may benefit from being tied with a sash. You will want to order a longer linen in this case as cinching shortens the length.

Linen Care and Handling

- When using candles please remember to snuff, not blow the candles out to avoid permanent wax damage. Candles should always be in a candle holder to prevent heat damage to the linen.
- Our specialized linen team takes care of all laundering needs for your convenience. After use, simply shake out the used linens to remove all debris and place them in the linen bags provided. Damp linens should be air dried prior to placing inside the linen bags to eliminate potential damage to the fabric.
